PROFESSIONAL SUMMARY

Python Full Stack Developer with 1.5+ years of professional experience in developing and maintaining web applications using Python, Django, React, and Next.js. Experienced in RESTful API development, database management, SQL Server stored procedures, and frontend-backend integration. Hands-on experience with Payload CMS, MongoDB, IIS deployment, and application maintenance. Skilled in translating business requirements into functional software solutions throughout the Software Development Life Cycle (SDLC).

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Backend Development:** Django, REST API Development
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Bootstrap
- **Databases:** Microsoft SQL Server, MySQL, MongoDB, SQLite
- **CMS:** Payload CMS
- **Tools and Platforms:** Git, GitHub, Postman, Power BI
- **Deployment:** IIS Server
- **Development Environment:** Visual Studio, Visual Studio Code

PROFESSIONAL EXPERIENCE

Voleergo Solutions, Kakkanad, Ernakulam March 2025 – Present
Senior Software Developer

- Develop and maintain full-stack web applications using Python, Django, React, and Next.js, working across frontend, backend, and database layers.
- Design, develop, and integrate RESTful APIs to connect frontend applications with backend services and implement application-specific business logic.
- Design and manage SQL Server databases, including table structures, stored procedures, complex SQL queries, and database operations.
- Develop responsive user interfaces and integrate frontend components with backend functionality.
- Participate in client meetings and requirement discussions, translating business requirements into practical software solutions.
- Perform functional testing, debugging, and performance optimization to improve application stability and reliability.
- Handle application deployment and configuration on IIS servers, including production deployments, environment setup, troubleshooting, and maintenance.
- Work across the Software Development Life Cycle (SDLC), from requirement analysis and development to testing, deployment, and post-deployment support.
- Develop Power BI dashboards and reports to provide meaningful data insights and support business decision-making.

Luminar Technolab, Kakkanad, Ernakulam July 2024 – February 2025
Python Full Stack Developer Intern

- Developed and maintained web application features using Python and Django.
- Worked with MySQL and SQLite databases, performing database design and CRUD operations.
- Assisted in implementing backend functionality and integrating application components.
- Identified and resolved application issues through debugging and testing.
- Gained practical experience in Python full-stack development and database management.

PROJECTS

Voleergo Academy Web Application *Python, Django, React.js, Next.js, SQL Server*

- Developed a full-stack educational platform using Django REST APIs with a React/Next.js frontend.
- Implemented core functionalities including user authentication, course enrollment, and student dashboards.
- Developed backend API endpoints to manage application data and frontend interactions.
- Designed and optimized SQL queries for efficient database operations, supporting 100+ users.
- **Project URL:** voleergoacademy.com

Regional Sports Centre (RSC) Website *Next.js, Payload CMS, MongoDB*

- Developed a dynamic website for Regional Sports Centre (RSC) as a client project for Voleergo Solutions.
- Integrated Payload CMS with MongoDB for dynamic content management and data storage.
- Implemented CMS-driven features allowing administrators to manage sports events, facilities, and announcements.
- Developed responsive frontend components and integrated CMS APIs.
- Implemented server-side rendering (SSR) and SEO techniques to improve website performance and search visibility.
- **Project URL:** rsckochi.com

WhatsApp CRM – Business Communication Platform *Django, Next.js, SQL Server*

- Developed a WhatsApp CRM and business communication platform as a product of Voleergo Solutions, designed for commercial deployment and customer use.
- Implemented WhatsApp configuration, messaging automation, broadcast messaging, and lead management functionalities.
- Developed backend functionality to support efficient message handling, customer management, and business workflows.
- Implemented role-based access management and database operations.
- **Project URL:** whatsappcrm.voleergo.com

E-commerce Platform *Python, Django, React.js, SQL Server*

- Developed a full-stack e-commerce application using Django and React.js.
- Implemented user authentication, product management, shopping cart, and order management functionalities.
- Developed backend functionality for managing products, users, and orders.
- Designed responsive frontend components using React.js, HTML, CSS, and Bootstrap.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering August 2021 – June 2024
College of Engineering, Adoor
CGPA: 6.88

Diploma in Computer Engineering July 2019 – June 2021
Government Polytechnic College, Perumbavoor
CGPA: 8.01

CERTIFICATIONS

Coursera

- C for Everyone: Programming Fundamentals
- Programming for Everybody: Getting Started with Python
- Introduction to HTML
